Summary: SQA Engineer with 3+ years of experience in Web, SaaS, and Mobile application testing, specialising in manual and automation testing. Skilled in requirement analysis, test planning, and end-to-end validation across SDLC. Hands-on experience with Playwright, Cypress, Selenium, and Appium, with CI/CD integration via GitHub Actions. Actively integrates AI-driven workflows into QA processes, including building custom AI agents to improve efficiency, coverage, and test automation.

Employment History — Total Experience: 3+ years

SQA Engineer

TulipTech Ltd.

Duration: *March 2026 – Present*

- Design, develop, and execute API test cases using Postman, primarily testing REST APIs for functionality, request/response validation, authentication, headers, payload validation, status codes, and error handling.
- Perform manual testing across web and mobile applications, including functional, exploratory, and compatibility testing across sprints, followed by frontend validation after API-level checks.
- Identify, document, and track defects using Jira; perform root cause analysis, write detailed bug reports, and assist developers in debugging and verifying fixes.
- Execute smoke, integration, sanity, and regression testing to validate application performance, stability, and release readiness.
- Collaborate closely with development teams to ensure seamless integration and delivery of high-quality software.
- Document test cases, test results, and test strategies to ensure complete traceability, importing structured cases into TestRail for consistent QA documentation.
- Apply AI-assisted workflows, including custom-built AI agents, to auto-generate structured Postman collections from documentation and speed up test setup without compromising coverage.
- Developed and maintained automation test scripts following the Page Object Model (POM) design pattern for projects under active development.

Projects:

- **StretchSense**: An enterprise XR device management platform for centralised XR device management, security, and scalability. Currently handling a full QA cycle solely.
- **PharmaZ247:** A multi-tenant pharmacy ERP and telehealth platform spanning web, mobile, and desktop. Took the MVP to market; handled manual, functional, and API testing.
- **VelaCrew:** An AI-agent project management platform where each teammate has a personal AI agent - agent-to-agent collaboration (team) , human-approved agent task updates, and maintenance CRM . Covered functional, multi-user, security, and adversarial AI-agent testing across dev and production.
- **LolerFlow:** A UK LOLER compliance and lifting-equipment inspection platform with simPro integration. Performed manual and API testing across inspection workflows and integration accuracy.
- **Empathika**: An AI-powered all-in-one care home management platform (medication, care planning, HR, compliance). Contributed to QA validation over one sprint.

QA Engineer

Shadhin Technologies Ltd.

Duration: *June 2023 – Feb 2026*

- Designed and executed comprehensive manual and automation test cases to validate system behavior against business and functional requirements across web and mobile platforms.
- Worked closely with stakeholders to gather, analyze, and document product requirements, translating business needs into structured SRS, STS, and UIS documents aligned with SDLC practices.
- Maintained a detailed Requirements Traceability Matrix (RTM) ensuring full traceability between requirements, test cases, and reported defects.
- Performed functional, regression, integration, and UAT testing to ensure high product quality and release readiness.
- Reviewed and validated UI/UX flows against business rules and usability standards, proactively identifying gaps and recommending improvements to enhance product experience.
- Created and maintained structured test plans, test scenarios, and requirement-linked test cases with strong documentation standards.
- Tracked requirements, tasks, and defects using Jira in Agile/Scrum environment, participating in sprint planning, stand-ups, and retrospectives.
- Contributed to automation initiatives (Playwright/Cypress/Selenium) and supported CI/CD-based execution workflows to improve test efficiency and coverage.
- Demonstrated strong ownership mindset, proactively identifying risks, improving processes, and collaborating effectively in hybrid/remote teams.
- Mentored QA interns on requirement analysis, documentation standards, and quality best practices.

Projects:

- **Docadvisor**: A generative AI-based doctor recommendation system.
- **Purbachol Water Supply Project (PWSP):** An automated water billing management system.
- **Host-A-Akhor:** A platform for storing old writings and voices.
- **NRB World:** A business networking platform designed for Bangladesh's non-residents.
- **Quran with Maryam:** a mobile and web platform for listening to the Quran and Dua and learning the Quran, as well as hiring knowledgeable individuals for one's own Islamic events.
- **Billions for Bangladesh**: A platform with the aim of raising billions of dollars for Bangladesh.
- **Black Pigeon HR**: A platform to make the hiring process easy (ongoing).
- **Looop Denki**: An electricity billing management system of Japan.

Functional Testing (Intern)

A1qa

Duration: *April 2023 – June 2023*

- Proficient in tracking and resolving defects, ensuring thorough documentation.
- Skilled in using Jira for task management, sprint planning, and issue tracking.
- Capable of designing and conducting test surveys to gather feedback and identify issues early.

Preferred Working Tools/Technologies

Software Testing & QA	Mobile Application Testing, API Testing, Automation Testing, Functional Testing, Regression Testing, Integration Testing, and UAT Testing, Test Case Writing & Execution, Bug Reporting & Defect Tracking, Cross-Browser & Cross-Platform Testing.
Programming/Markup Languages	Python, JavaScript, HTML, and CSS.

Testing Tools	TestRail, Playwright, Appium, Cypress, Selenium, Postman, Chrome DevTools.
MCP & AI Tools	Claude Code CLI, Playwright MCP, Chrome DevTools MCP, TestRail API Integration, Postman API Automation
CI/CD & Version Control	Git, GitHub, GitHub Actions (CI/CD Pipeline Automation).
Database	MySQL (Basics)
Development Methodology	Agile & Scrum methodologies, SDLC, STLC
Tools	Slack, Odoo, Jira, Google Workspace, and Trello.

Academic Qualification

Exam Title	Concentration	Institute	Pass. Year
BSc Computer Science & Engineering	Computer Science	North South University	2022

Professional Training

Training Title	Organized By
ISTQB® Certified Tester Foundation Level 4.0	ISTQB (International Software Testing Qualifications Board)
SQA	IT Training BD
Business Analysis	Udemy
Cypress: Web Automation Testing	Udemy
ISO 27001:2022 (ISMS)	Alison / Udemy
